OFFICE OF PUBLIC AFFAIRS – SALIENT EVENTS

Week Ending July 27, 2012

Non-responsive

Dimock Rollout Brings on the Media - EPA's news release announcing that it has completed sampling of private drinking water wells in Dimock, Pa. triggered an onslaught of media coverage from local, state and national outlets. Based on the outcome of its sampling, EPA has determined that there are no levels of contaminants present that would require additional EPA action and that it is no longer necessary for EPA to

provide residents with alternative water. Media coverage generally focused on EPA's final announcement but also included critical comments from residents and comments from Cabot and drilling groups that were pleased with EPA's conclusion. (Terri White, 814-5523 and Roy Seneca, 814-5567)
